INTRODUCTION. During the first half of the 20 th century, the complete blood count (CBC), one of the most commonly ordered laboratory tests, was performed using exclusively manual techniques: Blood cell counts (red cells, white cells, platelets) were performed using appropriately diluted blood samples and a ruled counting chamber (hemocytometer). Hemoglobin concentration was analyzed ...Find your hematology analyzer easily amongst the 256 products from the leading brands (Urit, Wiener Laboratorios, Diatron, ...) on MedicalExpo, the medical equipment specialist for your professional purchases. Blast cells. Approaching leukocytosis in a patient requires confirmation of the leukocyte differential count to determine the types of cells present and which type is elevated. 11 This is performed by examining a PB smear and either confirming the automated cell differential or performing a manual leukocyte differential.
